Assignment 2

For your chosen system or project, it is essential to provide a comprehensive analysis that encompasses all critical aspects of the system you intend to design and develop. *Your submission should include the following details*:

- ✓ **System Name**: Clearly define the name of your system to establish its identity.
- ✓ **System Aim & Services**: Outline the primary objectives of the system and the range of services it will offer to its users.
- ✓ **Brief Overview of the System**: Provide a succinct description that captures the essence of the system, including its functionality and intended user experience.
- ✓ **Database Diagram**: Include a detailed diagram illustrating the database structure, showcasing how data is organized and interconnected within the system.
- ✓ **Additional Elements**: Consider incorporating other pertinent information that may enhance the understanding of the system, such as user roles, security measures, and system architecture.

By thoroughly addressing these elements, you will create a well-rounded analysis that clearly communicates the vision and framework of your project.
